RR6022A 22"

\$2,499

Price for Crated Unassembled Unit *Taxes, Freight, or Assembly Extra

The RR6022A is outfitted with a 10HP Rato Recoil Start engine. Designed with a durable 4-post Saw Head structure featuring a rear cross support, the carriage is fitted with durable grooved roller wheels containing sealed bearings to guarantee the saw head moves smoothly. Sealed bearings prevent vibration-induced wear and tear, enhancing precision, performance, and longevity. The manual feed saw head features an adjustable push handle and ergonomic throttle, giving users complete control while cutting, ensuring maximum safety. A centrifugal clutch blade engagement system driven by a belt offers the highest power transfer efficiency from the engine to the sawblade, leading to a more seamless operation overall. The hand-crank lifting mechanism on the saw head enables uncomplicated adjustment of cutting depth. This functionality offers precise control over the thickness of each cut on the log, ensuring accurate milling of lumber tailored to the exact dimensions needed for your project. An adjustable log clamp is provided to secure logs firmly in place during the cutting process, ensuring precise lumber production.

ENGINE

The RR6036AW is outfitted with a 22HP Rato Electric Start engine. Designed with a durable 4-post Saw Head structure featuring a rear cross support, the carriage is fitted with durable grooved roller wheels containing sealed bearings to guarantee the saw head moves smoothly. Sealed bearings prevent vibration-induced wear and tear, enhancing precision, performance, and longevity. The redesigned heavy-duty track and wider bunk system provide ample support for the heaviest of your logs. The manual feed saw head features an adjustable push handle and ergonomic throttle, giving users complete control while cutting, ensuring maximum safety. A centrifugal clutch blade engagement system driven by a belt offers the highest power transfer efficiency from the engine to the sawblade, leading to a more seamless operation overall. The RR5195 Electric Power Head is included as standard on the 60 Series 36" saw head, enabling effortless adjustment of cutting depth. With its electric lift mechanism, you can ensure precise control over the thickness of each cut on the log, ensuring accurate milling of lumber tailored to the specific dimensions needed for your project. The adjustable blade guide provides blade stability on narrower cuts, ensuring accuracy every time. An adjustable log clamp is provided to secure logs firmly in place during the cutting process, ensuring precise lumber production.
