For more than ten years, the Range Road EcoPro300 Firewood Processor has stood out as a leader in acreage firewood processors. It's an affordable piece of equipment designed with the needs of homesteaders, ranchers, and small firewood businesses in mind.

The Answer For All Your Firewood Needs

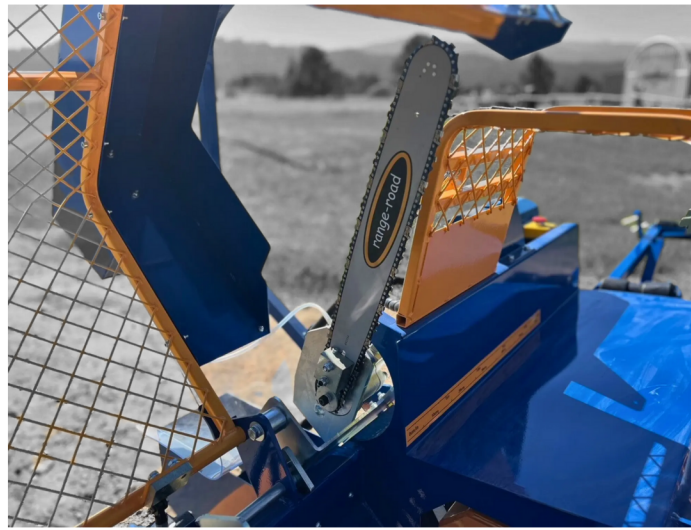

The EcoPro300 is engineered to process logs with a diameter of up to 16 inches, and 8 to 10 feet long with the standard manual infeed. The EcoPro300 features a hydraulically powered chainsaw that enables you to cut firewood to your desired length, with a maximum length of 24 inches.

A Powerful Firewood Processing Machine

With the powerful 27-ton splitting ram and 2/4-way splitting wedge (or optional 6-way splitting wedge), the EcoPro300 makes firewood splitting more efficient. Complete with a 10-foot output conveyor, this unit allows you to pile your firewood on the ground or load directly into a truck or trailer.

Your Solution To An Efficient Firewood Operation

The Range Road EcoPro300 is ready to make your firewood operation more enjoyable and productive. By adding accessories such as a log lifter or live deck, you can process longer logs, streamlining your operation. All the EcoPro300 Firewood Processor accessories can be added at any time, depending on your budget and requirements.
